

March 24, 2015

Dear Racers & Sanctioning Bodies,

As you know, the Scion FR-S offers performance and handling in a great looking vehicle. The suspension components from TRD take that already spectacular ride, and make it even better. These high-quality parts have been available to Scion customers beginning with the introduction of the 2013 FR-S, as both Post-Production Options and as Dealer-Installed Options, with that availability continuing for Model Year 2014 and 2015 vehicles.

TRD Lowering Springs Kit (P/N PTR07-18130)

- Enhances on-road vehicle performance—quicker turn-in, steering response and improved cornering
- Features TRD-developed proprietary spring rates (linear in front, progressive in rear)
- Lowers vehicle's center of gravity by approximately 1-in. (1 1/8-in.)
- Designed to work with stock struts and shock absorbers

TRD Sway Bar Kit (P/N PTR11-18130)

- Provides a flatter, more stable cornering stance
- Offers added performance and enhanced handling
- Reduces front wheel slip
- Helps provide greater control while preserving the secure handling of the original steering and suspension system
- Limits body roll without adding harshness to the ride
- Kit includes:
 - 20.6mm 4130 solid front sway bar
 - 15.8mm 4130 solid rear sway bar
 - Polyurethane bushings, front and rear, that fit the OEM brackets
 - Rear sub-frame reinforcement brackets
- Finished with durable, gloss-red powder coat, which resists corrosion while improving appearance and durability

I would like to personally thank you for your interest in TRD Performance Accessories, and wish you the best of luck with your race team's endeavors.

Sincerely,

Steve Reynolds
