VERSION 18.

WHEREIS® MAPS VERSION 18.

WHY UPDATE MY SAT NAV SYSTEM?

Australia is made up of more than 1,000,000kms of roads and highways and with an ever increasing population, new roads, developments and suburbs are popping up at a rapid rate. It can be hard to keep up.

That's why the process of capturing, interpreting, cross-checking and integrating data for Whereis® maps never stops. It's a pretty common misconception that Australian roads don't change that much and when people ask us about this, they are often surprised to learn that each new release of Whereis® mapping software actually captures between 10,000km and 15,000km of new roads and updates 235,000km per year through continuous research.

There's also the ongoing increase in the number of points-of-interest (POI) that map updates include. That's the database of information such as hotels, ATMs, hospitals, gyms, etc. that you can locate and use through your in-built satellite navigation system.

New maps are available annually but they don't update automatically. To ensure your sat nav is keeping up to date with your lifestyle, update your map data today.

OUR LATEST WHEREIS® MAP COMES WITH

- 1,148,445km of roads including more than 5,000km of new roads
- 283,436km of roads with address ranges
- More than 770,000 points-of-interest including
 - more than 32,800 restaurants
 - more than 16,945 banks and ATMs
 - more than 14,500 hotels and motels
 - more than 8,700 sport centres
 - more than 6,800 petrol stations

WHAT'S NEW?
